

CABERNET THEME

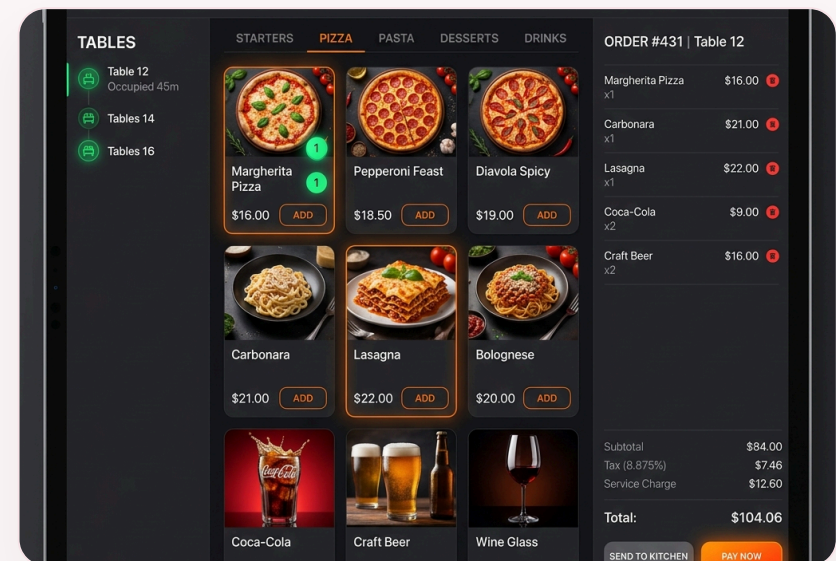

Go Back to **Owning** Your Restaurant's Software.

We build your POS exactly how you want it, with the features you need. Buy once, own it for life, and pay just ₹999/yr for maintenance.

Why are you **renting** your register?

Standard POS systems lock you into an endless subscription loop, eating your hard-earned profits month after month.

- ✗ **Continuous Bills:** You pay ₹2,000–₹5,000 every single month just to run your billing screens.
- ✗ **Locked-In Data:** If you cancel your monthly payments, they block access to your own sales history.
- ✗ **One-Size-Fits-All:** If you want a custom layout or special menu workflow, standard POS companies won't build it.

Our Model is Simple

No corporate jargon, no sales tricks. Just software ownership.

01

Built Exactly As You Like

Select features via our POS Configurator. Pay a one-time base fee of ₹14,999 (billing, layouts, printer routing, and core reports) and ₹5,000 per premium add-on feature. No hidden charges.

02

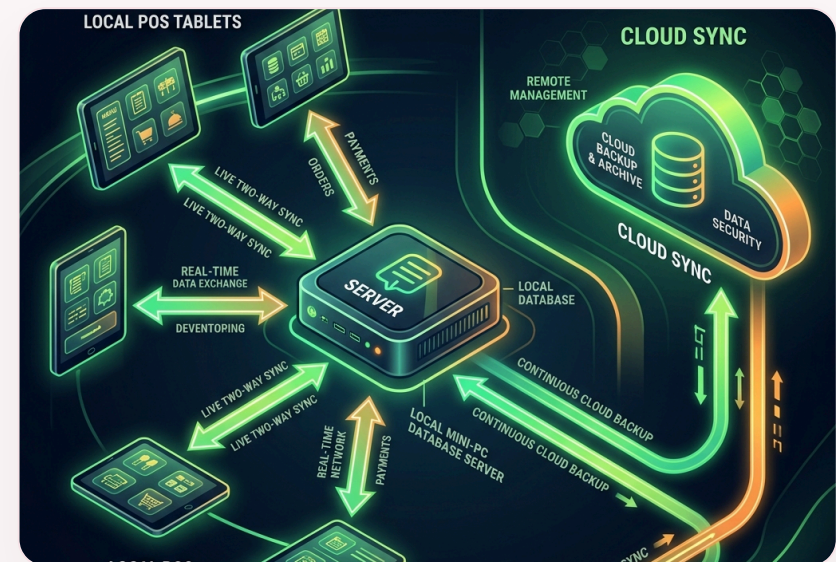

One-Time Fee, Own it for Life

You pay a single upfront fee to compile and deploy your code. The POS belongs to you forever. No recurring monthly subscriptions to keep your register open. No transaction cuts.

Raw Cloud Hosting. Zero Markups.

Other companies inflate server prices. We set up industry-standard cloud systems directly in your name so you control the bills.

- ✓ **Your Own Accounts:** Your POS code runs on Vercel and your database resides on Neon DB. We set these up for you directly.
- ✓ **₹0 Monthly Server Bills:** Both Vercel and Neon have massive free tiers. Under normal billing volume, you pay **₹0/month** for hosting.
- ✓ **No Middleman Tax:** If your restaurant grows and scales, you pay Neon/Vercel directly for exactly what you use. No markup.

Your Dedicated Tech Team

A flat, transparent fee to keep your software running flawlessly.

₹999 / Yr
FLAT UPKEEP & SUPPORT

SSL & Domain

We configure and manage your secure HTTPS address so your billing link is always live and safe.

Daily Backups

We set up automated database backups so your sales reports, billing data, and menus are never lost.

Core Upgrades

We run security updates and code optimizations to keep the database connections running fast.

Tech Support

Direct WhatsApp contact with our engineers. If anything goes wrong, we jump on it immediately.

Everything You Need to Run Your Outlet

POS Billing & KOT

Clean billing interface. Fire KOTs directly to kitchen printers, manage split bills, and process payments (UPI, Card, Cash) in under 3 clicks.

Table Layout Status

An interactive, graphical layout of your restaurant floor showing table seating occupancy, reserved spots, and bills due at a glance.

Table QR Self-Ordering

Provide branded table QR codes. Customers scan, browse your menu, and submit orders directly to the POS and kitchen, reducing staff load.

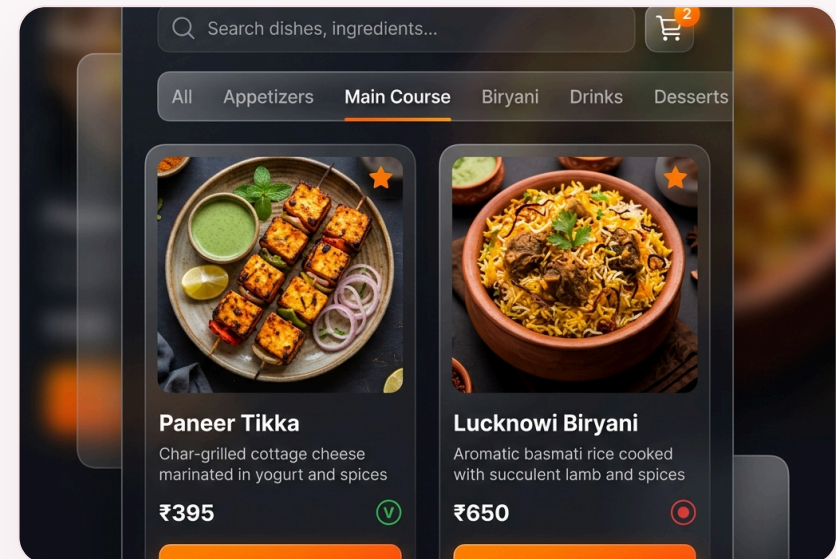

Ingredient Inventory & CRM

Recipe-based ingredient tracking that auto-deducts stock as bills print, alongside customer databases and loyalty points.

Internet Down? **Keep Billing.**

Other cloud POS applications freeze when the internet cuts. RestroPOS keeps working without missing a beat.

- ✓ **Local Mini-PC DB:** We set up a local database server inside your building. Your local devices communicate directly with it.
- ✓ **Automatic Cloud Sync:** The moment your internet reconnects, all transactions sync automatically to the cloud.
- ✓ **Zero Speed Lag:** Fast response times for billing tablets and thermal kitchen printers, regardless of external bandwidth.

The Math: SaaS Rent vs. Software Ownership

Expense Category	Subscription SaaS POS (Toast, Petpooja, etc.)	RestroPOS (Lifetime Ownership)
Upfront Charge	₹5,000 – ₹10,000	From ₹14,999 (Basic Package)
Monthly Software Rent	₹3,000/mo (Never-ending)	₹0 / month
Hosting & DB Costs	Bundled in subscription with high markup	₹0 (Direct on client free-tier accounts)
Year 1 Upkeep	₹36,000+	From ₹15,998 (Upfront + ₹999 Upkeep)
Year 2 & 3 Upkeep	₹72,000+	₹1,998 (Total for both years)
Total 3-Year Outlay	₹1,08,000+ (And you own nothing)	From ₹17,996 (Own forever)

Go back to owning your software.

Setup takes under 20 minutes. We customize the POS, import your menu, connect hardware, and train your staff.
